PROFESSIONAL SUMMARY

Full-stack MERN developer with a B.E. in Electronics & Telecommunication Engineering, skilled in building and deploying applications using React/Vite frontends, Node.js/Express APIs, and MongoDB. Proven ability to integrate generative AI, including streaming AI responses and conversational interfaces with Google Gemini API, and experienced with real-time features using Socket.IO and WebRTC. Eager to leverage a strong foundation in web technologies and a passion for coding to contribute as a Software Developer Trainee.

SKILLS

technicalSkills: JavaScript (ES6+), React.js, Vite, HTML5, CSS3, Node.js, Express.js, REST API Design, MongoDB, Mongoose, Google Gemini API, LLM-based conversational features, Streaming AI responses, Socket.IO, WebRTC, JWT, Git/GitHub

softSkills: Good Problem-Solving Skills, Willingness to Learn, Positive Learning Attitude

toolsAndFrameworks: Bootstrap, Responsive UI Design, Cookie-based sessions, Postman, VS Code, Render, Vercel, Cloudinary, Multer, CORS, Cookie-Parser, MySQL

PROJECTS

AI Chat Application — Full-Stack AI Chat with Gemini

[Live Demo](#) | [GitHub](#)

Developed a full-stack AI chat application with React, Vite, Node.js, Express, and MongoDB, integrating Google Gemini API for streaming conversational AI responses. Implemented JWT-based authentication with cookie sessions and designed a responsive chat UI with persistent chat history. Deployed the full stack on Render.

- Integrated Google Gemini API for streaming AI responses.
- Implemented secure JWT authentication and persistent chat history.
- Deployed full-stack application on Render.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT, Cookie-Parser, CORS

ChatFlow – Real-Time Chat Application

[Live Demo](#) | [GitHub](#)

Built a real-time chat application using MERN stack, Socket.IO, and WebRTC, featuring JWT authentication with Email OTP, one-to-one messaging, online status, and media sharing. Integrated voice/video calling capabilities using WebRTC.

- Implemented real-time features with Socket.IO and WebRTC for voice/video calls.
- Integrated secure JWT authentication with Email OTP verification.
- Enabled media and file sharing using Cloudinary and Multer.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Cloudinary, Multer, JWT

VoltBox – Personal Cloud Storage

[Live Demo](#) | [GitHub](#)

Developed a secure personal cloud storage platform using MERN stack with JWT authentication, enabling file management operations and integrating Cloudinary for cloud storage.

- Implemented JWT-based authentication and authorization for secure access.
- Enabled file upload, download, rename, and delete functionalities.
- Integrated Cloudinary for efficient and secure cloud file storage.

Technologies: React, Node.js, Express.js, MongoDB, Cloudinary, JWT

Grocery Management System

[Live Demo](#) | [GitHub](#)

Built a full-stack inventory and sales management system for grocery stores using Node.js, Express.js, and MySQL, featuring product management, inventory tracking, and sales modules with secure authentication.

- Developed modules for product management, inventory tracking, and sales.
- Implemented secure authentication and CRUD operations.
- Designed dashboards for monitoring sales and revenue.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Telecommunication Engineering

JSPM's Narhe Technical Campus
