PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building, testing, and shipping robust MERN stack applications with clean, maintainable architecture. Proficient in crafting responsive React frontends, scalable Node.js/Express REST APIs, MongoDB data models, and secure JWT-based authentication.

SKILLS

technicalSkills: React.js, Node.js, Express.js, MongoDB, Mongoose, JavaScript (ES6+), REST API Design, HTML5, CSS3, Bootstrap, Responsive UI Design, Socket.IO, WebRTC (voice/video calling), JWT, Email OTP verification, Cookie-based sessions, MySQL, C, C++

toolsAndFrameworks: Vite, Git/GitHub, Postman, VS Code, Render, Vercel, Cloudinary, Multer, Google Gemini API

PROJECTS

AI Chat Application — Full-Stack AI Chat with Gemini

[Live Demo](#) | [GitHub](#)

Full-stack AI chat application built using React, Vite, Node.js, Express, and MongoDB, integrated with Google Gemini API for streaming conversational responses.

- Developed full-stack MERN architecture featuring token-by-token streaming AI conversational responses via Google Gemini API.
- Implemented secure JWT-based authentication with cookie sessions and persistent chat history enabling users to create, save, revisit, and delete chats.
- Designed a responsive chat UI with sidebar navigation and deployed the unified client and server service on Render.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT, Cookie-Parser, CORS

ChatFlow – Real-Time Chat Application

[Live Demo](#) | [GitHub](#)

Full-stack real-time communication platform built on the MERN stack, Socket.IO, and WebRTC.

- Engineered real-time one-to-one messaging, typing indicators, and online/offline status detection using Socket.IO.
- Integrated WebRTC for voice and video calling alongside Cloudinary and Multer for seamless media and file sharing.
- Secured user access and verification flows through robust JWT authentication and Email OTP verification.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Cloudinary, Multer, JWT

VoltBox – Personal Cloud Storage

[Live Demo](#) | [GitHub](#)

Secure personal cloud storage web application developed using the MERN stack with Cloudinary integration.

- Constructed complete file management operations including secure file upload, download, renaming, deletion, and folder/album organization.
- Implemented JWT-based authentication and authorization coupled with Cloudinary integration for cloud storage.
- Created a clean, responsive dashboard interface to deliver efficient file organization and seamless navigation.

Technologies: React, Node.js, Express.js, MongoDB, Cloudinary, JWT

Grocery Management System

[Live Demo](#) | [GitHub](#)

Full-stack inventory and sales management system developed for grocery store operations.

- Built modular back-end services using Node.js and Express to manage product catalogs, inventory tracking, and sales records.
- Implemented secure user authentication and CRUD operations with structured MySQL data storage.
- Designed intuitive analytical dashboards for tracking store performance, inventory levels, and overall revenue.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Telecommunication Engineering

JSPM's Narhe Technical Campus
