PROFESSIONAL SUMMARY

Detail-oriented Full Stack Web Developer with a strong foundation in MERN stack development, seeking to leverage analytical and problem-solving skills in a Test Engineer role. Proven ability to build and deploy robust web applications, demonstrating an inherent understanding of application quality, debugging, and functional verification, complemented by hands-on experience with Postman for API interaction.

SKILLS

technicalSkills: Postman, JavaScript (ES6+), Node.js, Express.js, React.js, Vite, HTML5, CSS3, Bootstrap, Responsive UI Design, REST API Design, MongoDB, Mongoose, MySQL, Git/GitHub, Google Gemini API, LLM-based conversational features, streaming AI responses, prompt design, Socket.IO, WebRTC (voice/video calling), JWT, Email OTP verification, cookie-based sessions, C, C++

softSkills: Analytical Thinking, Problem-Solving, Attention to Detail, Requirement Understanding, Communication, Teamwork

toolsAndFrameworks: Postman, Node.js, Express.js, React.js, Vite, MongoDB, Mongoose, MySQL, Cloudinary, Multer, Socket.IO, WebRTC, Git/GitHub, VS Code, Render, Vercel

languages: JavaScript, C, C++

PROJECTS

AI Chat Application — Full-Stack AI Chat with Gemini

[Live Demo](#) | [GitHub](#)

Developed a full-stack AI chat application, integrating the Google Gemini API for streaming conversational AI responses. Focused on building a robust and secure platform with comprehensive user features.

- Implemented secure JWT-based authentication with cookie sessions for user registration and login, ensuring robust access control and security validation.
- Designed and verified persistent chat history, allowing users to create, save, revisit, and delete past conversations, ensuring data integrity and retrieval accuracy.
- Built a responsive chat UI with sidebar navigation, mirroring modern AI chat product patterns, and ensuring cross-device and browser compatibility.
- Deployed the full stack (client + server) as a single service on Render, demonstrating end-to-end deployment and operational verification.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT, Cookie-Parser, CORS

ChatFlow – Real-Time Chat Application

[Live Demo](#) | [GitHub](#)

Engineered a full-stack real-time chat application, incorporating advanced communication features and robust security protocols.

- Implemented secure JWT authentication with Email OTP verification, enhancing user security and validating multi-factor authentication flows.
- Developed one-to-one messaging, real-time online/offline status, and typing indicators, requiring rigorous testing of concurrent user interactions and state management.
- Integrated media and file sharing capabilities using Cloudinary and Multer, ensuring reliable content delivery and storage.
- Added voice and video calling functionalities using WebRTC, demonstrating expertise in complex real-time communication feature development and testing.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Cloudinary, Multer, JWT

VoltBox – Personal Cloud Storage

[Live Demo](#) | [GitHub](#)

Developed a secure personal cloud storage platform, focusing on robust file management and user authentication within a MERN stack environment.

- Developed a secure personal cloud storage platform using the MERN stack with JWT-based authentication and authorization, ensuring data privacy and access control.
- Enabled comprehensive file upload, download, rename, delete, and folder/album management functionalities, requiring thorough CRUD operation testing and data validation.
- Designed a responsive dashboard for efficient file organization, ensuring optimal user experience across various devices and screen sizes.
- Integrated Cloudinary for secure cloud file storage, verifying reliable external service integration and data persistence.

Technologies: React, Node.js, Express.js, MongoDB, Cloudinary, JWT

Grocery Management System

[Live Demo](#) | [GitHub](#)

Built a full-stack inventory and sales management system for grocery stores, emphasizing product management, inventory tracking, and sales modules.

- Built a full-stack inventory and sales management system with secure authentication and CRUD operations, demonstrating an understanding of business logic and data validation.
- Implemented robust product management and inventory tracking features, ensuring accurate data handling and system reliability.
- Developed sales modules and dashboards for monitoring sales and revenue, requiring verification of data aggregation and reporting accuracy.
- Ensured secure authentication and authorization mechanisms, validating user access and data protection within the system.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Telecommunication Engineering

JSPM's Narhe Technical Campus
