PROFESSIONAL SUMMARY

Detail-oriented Full Stack Web Developer with a strong foundation in building robust MERN applications, eager to apply comprehensive understanding of software architecture and functionality to a Test Engineer role. Proven ability to implement complex features, ensure data integrity, and troubleshoot issues, demonstrating a keen eye for quality assurance and problem-solving.

SKILLS

technicalSkills: JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB, MySQL, REST API Design, HTML5, CSS3, Responsive UI Design, Google Gemini API, Socket.IO, WebRTC, JWT, Git/GitHub

softSkills: Analytical & Problem-Solving Skills, Attention to Detail, Requirement Understanding, Communication & Teamwork

toolsAndFrameworks: Postman, Vite, Mongoose, Cloudinary, Multer, VS Code, Render, Vercel

languages: C, C++

PROJECTS

AI Chat Application — Full-Stack AI Chat with Gemini

[Live Demo](#) | [GitHub](#)

Developed a full-stack AI chat application integrating the Google Gemini API for streaming conversational AI responses. Implemented secure JWT-based authentication and persistent chat history.

- Integrated Google Gemini API for streaming conversational AI responses, requiring robust error handling and response validation.
- Implemented secure JWT-based authentication with cookie sessions, demonstrating attention to data integrity and security.
- Designed persistent chat history, ensuring data consistency and user experience across sessions.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Google Gemini API, JWT

ChatFlow – Real-Time Chat Application

[Live Demo](#) | [GitHub](#)

Developed a full-stack real-time chat application using MERN, Socket.IO, and WebRTC, featuring secure authentication and media sharing.

- Built real-time chat with Socket.IO and WebRTC for voice/video calling, demanding rigorous testing for concurrency, performance, and media reliability.
- Implemented secure JWT authentication with Email OTP verification, ensuring robust user access control.
- Integrated media and file sharing, requiring thorough validation of upload and download functionalities.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Cloudinary, Multer, JWT

Grocery Management System

[Live Demo](#) | [GitHub](#)

Built a full-stack inventory and sales management system for grocery stores, with product management, inventory tracking, and sales modules.

- Designed an inventory and sales management system with CRUD operations and dashboards, requiring thorough functional and data validation testing.
- Implemented secure authentication and authorization, demonstrating attention to system security.
- Developed modules for product management and inventory tracking, ensuring data accuracy and system reliability.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Telecommunication Engineering

JSPM's Narhe Technical Campus
