PROFESSIONAL SUMMARY

Detail-oriented Full Stack Web Developer with a strong foundation in building robust MERN applications, now seeking to transition into a Test Engineer role. Eager to apply a comprehensive understanding of web application architecture, API design, and user interface development to ensure software quality through manual and basic automation testing, with a keen eye for identifying and reporting defects.

SKILLS

technicalSkills: JavaScript (ES6+), React.js, Node.js, Express.js, REST API Design, HTML5, CSS3, Bootstrap, Responsive UI Design, MongoDB, MySQL, Git/GitHub, Postman, Basic Automation Testing Concepts, Bug Identification, Test Case Understanding

softSkills: Analytical & Problem-Solving Skills, Attention to Detail, Requirement Understanding, Communication & Teamwork

toolsAndFrameworks: Postman, VS Code, Render, Vercel

languages: C, C++, JavaScript

PROJECTS

AI Chat Application — Full-Stack AI Chat with Gemini

[Live Demo](#) | [GitHub](#)

Developed a full-stack AI chat application, implementing secure JWT authentication and persistent chat history, requiring thorough validation of user authentication flows and data integrity. Designed a responsive UI, ensuring cross-device compatibility and user experience.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT, Cookie-Parser, CORS

VoltBox – Personal Cloud Storage

[Live Demo](#) | [GitHub](#)

Built a secure cloud storage platform with JWT authentication and Cloudinary integration, focusing on robust file upload/download/management, which involved validating various data operations and security protocols.

Technologies: React, Node.js, Express.js, MongoDB, Cloudinary, JWT

ChatFlow – Real-Time Chat Application

[Live Demo](#) | [GitHub](#)

Created a real-time chat application with Socket.IO and WebRTC for voice/video, featuring JWT authentication and Email OTP, necessitating rigorous validation of real-time communication, security, and media sharing functionalities.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Cloudinary, Multer, JWT

Grocery Management System

[Live Demo](#) | [GitHub](#)

Engineered an inventory and sales management system with secure authentication and CRUD operations, involving comprehensive validation of product management, inventory tracking, and sales reporting features.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Telecommunication Engineering

JSPM's Narhe Technical Campus
