## PROFESSIONAL SUMMARY

Full-stack web developer with a B.E. in Electronics & Telecommunication Engineering, possessing hands-on experience in building and deploying MERN stack applications. Proficient in React/Vite frontends, Node.js/Express.js APIs, MongoDB, and integrating advanced features like JWT authentication, Socket.IO, and WebRTC. Recently focused on incorporating generative AI, including streaming AI responses and conversational interfaces using the Google Gemini API. Eager to leverage a strong foundation in web technologies and a passion for coding to contribute as a Software Developer Trainee at Kaspro IT Solutions.

## SKILLS

**technicalSkills:** JavaScript (ES6+), React.js, Vite, HTML5, CSS3, Node.js, Express.js, REST API Design, MongoDB, Mongoose, Google Gemini API, LLM-based conversational features, Streaming AI responses, Prompt design, Socket.IO, WebRTC (voice/video calling), JWT, Email OTP verification, Cookie-based sessions, MySQL, C, C++

**softSkills:** Good Problem-Solving Skills, Willingness to Learn, Positive Learning Attitude

**toolsAndFrameworks:** Bootstrap, Responsive UI Design, Cloudinary, Multer, Cookie-Parser, CORS, Git/GitHub, Postman, VS Code, Render, Vercel

## PROJECTS

### AI Chat Application — Full-Stack AI Chat with Gemini

[Live Demo](#) | [GitHub](#)

Developed a full-stack AI chat application leveraging React, Vite, Node.js, Express, and MongoDB, featuring real-time conversational AI responses via the Google Gemini API. Implemented secure JWT-based authentication with cookie sessions for user management and designed persistent chat history for saving, revisiting, and deleting conversations. Built a responsive chat UI with sidebar navigation, mirroring modern AI chat product patterns, and deployed the full stack as a single service on Render.

- Integrated Google Gemini API for streaming AI responses, enhancing user interaction.
- Implemented JWT authentication and cookie sessions for secure user registration and login.
- Designed and developed persistent chat history functionality, allowing users to manage conversations.
- Created a responsive UI with modern design patterns for an intuitive user experience.
- Successfully deployed the full-stack application on Render.

**Technologies:** React (Vite), Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT, Cookie-Parser, CORS

### ChatFlow – Real-Time Chat Application

[Live Demo](#) | [GitHub](#)

Engineered a full-stack real-time chat application using the MERN stack, Socket.IO, and WebRTC, incorporating secure JWT authentication with Email OTP verification. Features include one-to-one messaging, real-time online/offline status indicators, and typing notifications. Integrated media and file sharing via Cloudinary and Multer, and enabled voice/video calling capabilities using WebRTC.

- Implemented real-time communication features using Socket.IO for instant messaging and status updates.
- Integrated WebRTC for seamless one-to-one voice and video calling functionality.
- Secured user authentication using JWT and Email OTP verification for enhanced security.
- Enabled media and file sharing capabilities through Cloudinary and Multer integration.
- Developed a dynamic and responsive user interface for an engaging chat experience.

**Technologies:** React (Vite), Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Cloudinary, Multer, JWT

### VoltBox – Personal Cloud Storage

[Live Demo](#) | [GitHub](#)

Built a secure personal cloud storage platform utilizing the MERN stack, featuring JWT-based authentication and authorization for robust access control. Enabled comprehensive file management functionalities including upload, download, rename, and delete operations, alongside folder and album organization. Designed a responsive dashboard for efficient file management and integrated Cloudinary for secure cloud-based file storage.

- Developed a secure MERN stack application for personal cloud storage with JWT authentication.
- Implemented full file management capabilities: upload, download, rename, and delete.
- Designed an intuitive and responsive dashboard for efficient file organization.
- Integrated Cloudinary for scalable and secure cloud file storage solutions.
- Ensured robust authorization mechanisms for user data protection.

**Technologies:** React, Node.js, Express.js, MongoDB, Cloudinary, JWT

### Grocery Management System

[Live Demo](#) | [GitHub](#)

Created a full-stack inventory and sales management system for grocery stores, encompassing product management, inventory tracking, and sales modules. Implemented secure authentication, CRUD operations, and developed dashboards for monitoring sales performance and revenue.

- Developed core modules for product management, inventory tracking, and sales processing.
- Implemented secure user authentication and authorization for system access.
- Designed and built interactive dashboards for real-time sales and revenue monitoring.
- Utilized Node.js and Express.js for robust backend API development.
- Managed data persistence using MySQL database.

**Technologies:** HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL

EDUCATION

---

**Bachelor of Engineering (B.E.), Electronics & Telecommunication Engineering**

JSPM's Narhe Technical Campus
