Pune

PROFESSIONAL SUMMARY

Full-stack MERN developer with a B.E. in Electronics & Telecommunication Engineering, eager to leverage hands-on experience in building and deploying end-to-end web applications. Proven ability to integrate advanced features like generative AI (Google Gemini API) for streaming responses and conversational interfaces, alongside real-time communication tools (Socket.IO, WebRTC). Seeking a Software Developer Trainee role at Kaspro IT Solutions to apply and expand technical skills in a practical, project-driven environment.

SKILLS

technicalSkills: JavaScript (ES6+), React.js, Vite, HTML5, CSS3, Node.js, Express.js, REST API Design, MongoDB, Mongoose, MySQL, Google Gemini API, LLM-based conversational features, Streaming AI responses, Prompt design, Socket.IO, WebRTC (voice/video calling), JWT, Email OTP verification, Cookie-based sessions, Responsive UI Design

softSkills: Good Problem-Solving Skills, Willingness to Learn, Positive Learning Attitude

toolsAndFrameworks: Bootstrap, Cloudinary, Multer, Git/GitHub, Postman, VS Code, Render, Vercel, CORS, Cookie-Parser

languages: C, C++

PROJECTS

AI Chat Application — Full-Stack AI Chat with Gemini

[Live Demo](#) | [GitHub](#)

Developed a full-stack AI chat application using React, Vite, Node.js, Express, and MongoDB, integrated with the Google Gemini API for streaming conversational AI responses. Implemented secure JWT-based authentication with cookie sessions for user registration and login. Designed persistent chat history for users to create, save, revisit, and delete past conversations. Built a responsive chat UI with sidebar navigation, mirroring modern AI chat product patterns (e.g., streamed token-by-token responses). Deployed the full stack (client + server) as a single service on Render.

- Integrated Google Gemini API to provide streaming AI responses and conversational capabilities.
- Implemented JWT authentication and cookie sessions for secure user management.
- Developed a responsive UI with persistent chat history, supporting create, save, revisit, and delete functionalities.
- Successfully deployed the full-stack application as a single service on Render.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT, Cookie-Parser, CORS

ChatFlow – Real-Time Chat Application

[Live Demo](#) | [GitHub](#)

Developed a full-stack real-time chat application using the MERN stack, Socket.IO, and WebRTC. Implemented secure JWT authentication with Email OTP verification, one-to-one messaging, real-time online/offline status, and typing indicators. Integrated media and file sharing using Cloudinary and Multer, and added voice/video calling using WebRTC.

- Engineered real-time communication features including one-to-one messaging, online/offline status, and typing indicators using Socket.IO.
- Integrated voice and video calling capabilities leveraging WebRTC technology.
- Implemented secure JWT authentication with Email OTP verification for enhanced user security.
- Facilitated media and file sharing through integration with Cloudinary and Multer.

Technologies: React (Vite), Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Cloudinary, Multer, JWT

VoltBox – Personal Cloud Storage

[Live Demo](#) | [GitHub](#)

Developed a secure personal cloud storage platform using the MERN stack with JWT-based authentication and authorization. Enabled file upload, download, rename, delete, and folder/album management. Designed a responsive dashboard for efficient file organization and integrated Cloudinary for secure cloud file storage.

- Built a secure cloud storage platform with MERN stack, featuring JWT authentication and authorization.
- Implemented core file management functionalities including upload, download, rename, and delete operations.
- Developed a responsive dashboard for efficient file organization and management.
- Integrated Cloudinary for robust and secure cloud-based file storage.

Technologies: React, Node.js, Express.js, MongoDB, Cloudinary, JWT

Grocery Management System

[Live Demo](#) | [GitHub](#)

Built a full-stack inventory and sales management system for grocery stores, with product management, inventory tracking, and sales modules. Implemented secure authentication, CRUD operations, and dashboards for monitoring sales and revenue.

- Developed a comprehensive full-stack system for grocery inventory and sales management.
- Implemented key modules for product management, inventory tracking, and sales monitoring.
- Ensured secure user authentication and efficient CRUD operations for data management.
- Created dashboards for effective monitoring of sales and revenue trends.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL

EDUCATION

Bachelor of Engineering (B.E.), Electronics & Telecommunication Engineering

JSPM's Narhe Technical Campus
